Art Unit 3691

DETAILED ACTION

1. Claims 1-8 and 11-12 are presented for examination. Applicant filed amendment on 05/06/2008 canceling claims 9-10 and 13-29, and amending claims 1-2 and 11-12. After carefully reviewing Applicant's amendment, Examiner withdraws the outstanding rejection of claims 1-8 and objection of claims 11-12. Therefore, claims 1-8 and 11-12 are ALLOWED.

Allowable Subject Matter

2. Claims 1-8 and 11-12 are allowed. The following is a statement of reasons for the indication of allowable subject matter:

The claimed invention is directed to a method for facilitating payment to e-commerce merchants via a payment service.

The prior art of record, Bartoli et al., US patent No. 6,047,268, teaches serving a first web page via an electronic storefront containing visual content including a check-out option; receiving a check-out request from a consumer user of the electronic storefront to purchase one or more products from the electronic storefront; serving a second web page via the electronic storefront containing

hidden content including information to redirect the browser client to a web page hosted by a payment service web site, redirection to the web page hosted by the payment service web site causing the browser client to communicate a service cookie, stored by the browser client, to the payment service web site; extracting user identification information from the service cookie to determine an identify of the consumer user; determining whether the consumer user is authorized to use a payment service via a check with a corresponding user profile; determining whether the consumer user is authorized to use the payment service to make purchases from the electronic storefront; and serving a web-based check-out interface, hosted by the electronic storefront, to a browser client used by the consumer user, the check-out interface including an option to enable the consumer user to make payment for the one or more products via the payment service if it is determined the user is authorized to use the payment service.

Further, the prior of record, Agrawal et al., US patent publication No. 2004/0098313 A1, discloses redirecting the client browser to a third web page hosted by the electronic storefront.

However, the prior art does not disclose explicitly "storing information at the payment service web site, the information to redirect the browser client to the web page hosted by the payment service web site, the information including a return URL (uniform resource locator) corresponding to a third web page;

extracting the return URL embedded in the information; and comparing the return URL that is extracted to a return URL corresponding to the third web page to determine whether redirection to the third web page should be performed." This feature is found in independent claim 1. Therefore, independent claim 1 is allowable. Claims 2-8 and 11-12 are all dependent claims depending from claim 1. Therefore, dependent claims 2-8 and 11-12 are also allowable.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Day (6,728,767 B1) discloses remote identification of client and DNS proxy IP addresses.

Jacoby (2002/0107746 A1) discloses computerized commission based trading operations.

Leblang (2002/0120568 A1) discloses user-to-user payment service with payee-specific pay pages.

Sacks (2002/0016765 A1) discloses method for third-party payment processing.
